Elbit Systems Ltd

Is an international defense electronics company engaged in a wide range of programs throughout the world. The Company, which includes Elbit Systems and its subsidiaries, operates in the areas of military and commercial aerospace, land and naval systems, command, control, communications, computers, intelligence surveillance and reconnaissance ("C4ISR"), unmanned aircraft systems ("UAS"), advanced electro-optics, electro-optic space systems, EW suites, airborne warning systems, ELINT systems, data links and military communications systems and radios. The Company also focuses on the upgrading of existing military platforms, developing new technologies for defense, homeland security and commercial aviation applications and providing a range of support service
www.elbitsystems.com

Fairfax

The Fairfax County Economic Development Authority promotes Fairfax County, Virginia USA as a business and technology center. The FCEDA offers site location and business development assistance, and connections with county and state government agencies, to help companies locate and expand in Fairfax County. In addition to its headquarters in Tysons Corner, Fairfax County's largest business district, the FCEDA maintains marketing offices in six important global business centers: Bangalore, Munich, London, Los Angeles, Seoul and Tel Aviv.
www.FairfaxCountyEDA.org

Israel Aircraft Industries

IAI is a globally recognized leader in the military, homeland security and civil aerospace markets.
 IAI provides world leading unique solutions for a broad spectrum of needs in space, air, land, sea and homeland defense.
IAI's radars and EO payloads are securing a wide range of protected sites, from borders and coastlines, national symbols and strategic infrastructures, to population centers. These comprehensive integrated solutions often comprise airborne, ground based, maritime or mobile sensors, augmented by unattended platforms like aerostat or unmanned patrol vehicles, all integrated through secure information networks. IAI also offers a comprehensive suite of cyber- intelligence, cyber early warning, training and simulation systems for defense, intelligence, law enforcement and homeland security applications.
www.iai.co.il

Israel Military Industries Ltd

Established in 1933 and fully owned by the Israeli government, Israel Military Industries Ltd. (IMI) specializes in the development, integration and manufacture of offensive and defensive solutions for the modern battlefield and homeland security. IMI's state-of-the-art land, air and naval systems, draw on the extensive experience of the Israel Defense Forces (IDF). Most of these are combat-proven and have been type classified by the IDF, US Army, Air Force & Navy, as well as NATO members and armed forces worldwide

IMI's comprehensive solutions include end-to-end product support, from start to finish: training, integrated logistics support, maintenance and mid-life upgrades, transfer of technology and complete after sales support.

The company employs 3,400 skilled, highly-qualified and devoted employees in five divisions (Munitions Systems, Land Systems, Rocket Systems, Advanced Systems, Small Caliber Ammunition) and owns two subsidiaries: IMI Academy for Advanced Security & Anti-Terror Training and Ashot Ashkelon Industries
www.imi-israel.com

Magal S3 Ltd

Over the past 40 years, Magal S3 has developed a unique set of cutting-edge products for perimeter security applications. This long and rich history includes designing and implementing solutions tailored to fit sensitive sites in the most threatening environments in the world.

With years of defense industry experience in Israel and abroad, the company's system designers and project managers plan and execute complex security solutions across a broad range markets. Magal S3 delivers turnkey tailored solutions directly to customers. Magal S3 works through its local offices and/or partners worldwide to deliver services, support and implementation. Our security solutions enable effective real-time deterrence, detection and delay of intruders enabling the customer's first responders to diagnose, decide and defeat threats and manage their sites efficiently.
www.magal-s3.com

Mer Group

Security Division combines security, communications and intelligence expertise with many years of outstanding international experience to deliver end-to-end solutions to homeland security forces, intelligence organizations, corporates, military, governments, municipalities, and first response forces.
We believe that the key to effective security is accurate information delivered at the right time to an efficient and interconnected operational security force, equipped with cutting edge technologies. Mer Security Division helps organizations around the world to achieve this by combining state-of-the-art technologies with operational expertise and know-how, accumulate during decades of countering terror, combatting crime and enhancing public safety, trust and sense of security.
Mer Security's solutions offer a range of capabilities, from strategy and consulting, through developing, planning and implementation of cutting-edge technology to training, vetting and ongoing support.
www.mer-group.com

Rafael Advanced Defense Systems Ltd

Designs, develops, manufactures and supplies a wide range of high-tech defense systems for air, land, sea and space applications. Rafael's know-how is embedded in almost all Israel Defense Forces (IDF) systems in operation today. The company has a special relationship with the IDF, developing products according to the soldiers' specific requirements in the field. Rafael has also formed partnerships with civilian counterparts to develop commercial applications based on its proprietary technology. Rafael has created partnerships with companies in Israel and with leading aerospace and defense companies overseas. Rafael's highly skilled and dedicated workforce tackles complex projects, from initial development, through prototype, production and acceptance tests. It provides customer service and support, upgrading existing systems and offering turnkey projects involving the transfer of basic technologies or complete production facilities. Rafael current employs approximately 6,500 people.
www.rafael.co.il

Verint

Verint is a global leader in Actionable Intelligence solutions. In today's dynamic world of massive information growth, Actionable Intelligence is a necessity for empowering organizations with crucial insights and enabling decision makers to anticipate, respond and take action.
Our Actionable Intelligence solutions help organizations address three areas of the market—customer engagement optimization, security intelligence, and fraud, risk and compliance—by capturing large amounts of information from numerous data types and sources, using analytics to glean insights from the information, and leveraging the resulting intelligence to help achieve their customer engagement, enhanced security, and risk mitigation goals.

Agent video

Agent Video Intelligence (Agent Vi™) is the leading global provider of open architecture, video analytics software. The comprehensive video analytics solutions offered by Agent Vi extend from real-time video analysis and alerts to video search and business intelligence applications, and are fully integrated with a range of cameras, encoders and video management systems.

Based on Agent Vi's unique, patented, Image Processing over IP (IPoIP™) software architecture– which distributes the video analysis task between the camera and a server – Agent Vi's solutions can support up to 200 cameras running a full suite of video analytics functionalities on a single server, while offering superior accuracy and detection performance.

Founded in 2003, Agent Vi has sales, distribution and research and development operations around the globe. The company has proven deployments worldwide in retail, airports, rail hubs, highways, education, critical infrastructure, utility, government, financial institutions and metropolitan markets.

Integrating Agent Vi's advanced video analytics capabilities into existing or new surveillance networks enables users to benefit from the true potential of their surveillance networks, transforming them into intelligent tools that respond to the practical challenges of the 21st century.

www.agentvi.com

Beth El

Beth-El Zikhron Yaaqov Industries Ltd. is a leading worldwide manufacturer and designer of CBRN protection and filtration systems for bomb shelters containers, vehicles, tents and ships.

Beth-El also manufactures products for protection against explosions and blasts, unique medical isolation

products for pandemic protection, and vehicle subsystems such as fuel pumps and engine air filters for military tanks and heavy duty trucks.

More than 40 years of experience within real conflict scenarios, a customer base of more than 60 armies and civilian authorities from around the world, has given Beth-El Industries a vast knowledge in the fields of CBRN and blast protection and air filtration.

Beth-El Industries' in-house engineering ensures individualized and sophisticated solutions to today's security threats.

www.beind.com

BlueBird

Bluebird Aero Systems Ltd (established in 2002), is a dominant player in the Tactical Unmanned Aerial Systems (UAS) industry, specializes in design, development and production of Micro, Mini and tactical UAS and peripheral equipment, and delivers exceptional, unprecedented combat proven solutions to meet the challenges of the Military, HLS and civil UAS markets supporting peace keeping, low intensity conflict, security, disaster management, law enforcement and commercial applications.

www.bluebird-uav.com

Briefcam

BriefCam®, Ltd. is the developer and provider of Video Synopsis®, an award-winning technology that summarizes hours of events into a "brief" that extracts maximum value from video, recorded and live. BriefCam products enables rapid video review for decision support, security, safety and fast action, as well as serving as a productivity enhancement tool for organizations, enabling users to extract value from video that previously had gone unwatched.

BriefCam customers include police, military, border control and other Homeland Security agencies, as well as security operations at municipalities, transportation authorities, building and campus security offices, loss prevention and more. Current installations range from single-use sites to large-scale projects.

BriefCam supplies video surveillance vendors with a product add-on that sets them apart from the competition. Partnerships range from integration and technology agreements to a fully embedded BriefCam

Controp

Gyro -stabilized EO/IR camera systems for day / night Homeland Security and Defense Applications on board air/land/sea installations
www.controp.com

Defensoft

DEFENSOFT is a world leader and only independent provider of software solutions for the planning and design of large-scale border and perimeter security systems. Using DEFENSOFT's software and service solutions its clients optimize their spending to achieve maximum security for a given budget for their

borders and critical assets. This is achieved by combining DEFENSOFT's operational experience gained over more than a decade of successful field work in the most demanding environments, with its patented technology and unique planning procedures. Clients testify that DEFENSOFT saved them tens of millions of dollars by optimizing the amounts of equipment needed to secure their assets.

Clients use DEFENSOFT to plan and design deployment of detection and surveillance sensors, communication devices, fences, patrol roads, response units, barriers, and other security-related infrastructure. DEFENSOFT's team works with the customer to analyze threats, validate operational requirements, propose alternative concepts of operation (CONOPS), and finally to create a detailed design of the border or perimeter security solution that meets the customer's budget and requirements. DEFENSOFT is the army standard for planning border security in Israel since 2004.

www.defensoft.com

D fence
Development, design, manufacture, marketing and installation of Electronic Fencing, Perimeter Intrusion Detection Systems and Security Systems for the Public and Private sectors.

www.d-fence.com

Diagnose Israel Ltd.
Providing canine security and contraband detection services for a variety of applications and scenarios .
The DiagNose solutions are flexibly structured, to allow for adaptation to a wide range of operational settings and customer requirements .
This includes our unique proprietary RASCargO™ product, the world's leading REST (Remote Explosive Scent Tracing) solution. The solution provides amongst the highest throughput, highest detection levels, lowest false alarm rates and greatest cost effectiveness in cargo threat detection today .
Areas of application include air cargo, maritime cargo, border crossings, correctional facilities, customs checkpoints and others .
A list of our customers includes police forces, security organizations, border crossing authorities, airports, airlines, maritime ports, customs agencies among others .
DiagNose can provide the ultimate solution to your explosive and contraband detection needs.

www.diag-nose.com

El-Far

Perimeter Intrusion Detection Systems (PIDS) –
EL-FAR develops manufactures, delivers and supports its proprietary advanced Perimeter Intrusion Detection Systems and integrated perimeter security solutions that meet the full spectrum of security challenges found at military, industrial, governmental, commercial and civilian facilities around the world. Our field-proven systems are certified by the Israeli MOD, UK Home Office, unique ATEX standard, MIL-STD, CE, FCC and other international standards, addressing a wide spectrum of complex security scenarios, including silent infiltration attempts by sophisticated intruders.
EL-FAR works closely with leading system integrators and distributors worldwide with current projects in over 32 countries worldwide, covering over 1500Km of deployed systems and operating under challenging environmental conditions.
www.elfar.co.il

ESC Baz

Founded in 1994, ESC-BAZ is focused on the development and manufacturing of cost-effective Video Intelligence, Reconnaissance and Surveillance systems, as well as tactical security communication technologies for Homeland Security and Defense markets worldwide.
Our Perimeter Intrusion Detection Systems (PIDS) are perfectly suited for securing airports, harbors, construction sites, power & nuclear plants, oil refineries, and critical utilities (Electricity, Water, Telecom). With hundreds of installations and a vast experience in electro-optical system design, ESC-BAZ has positioned itself as a leading provider of advanced wired and wireless observation systems, for both government and civilian markets. Our systems include amongst others:
-AMI and ROOSTER man-portable lightweight for perimeter security and law enforcement.
-AVIV short and medium range Observation & Surveillance systems with LAYLA uncooled thermal camera.
-MORS and Giraffe, long range systems for Intelligence & Reconnaissance.
-TOM-SMS and AVIV Hawk-Eye, vehicle mounted surveillance systems for border & patrol security
-MAX, hand-held control & monitoring units with built-in digital video recorder.
- MODOS- a discreet Early-Warning Intruder's Detection system that includes motion-detection radar, seamlessly integrated with AVIV Video Surveillance and Observation system.
www.escbaz.com

Evigilo

eVigilo is a pioneer in the field of multi-channel alert and notification systems. eVigilo's population alert systems have been deployed worldwide delivering messages through a wide range of channels on national and regional scale.

eVigilo is the only vendor worldwide whose national population alert solutions have been deployed by multiple countries around the globe. eVigilo is selected vendor of many governments, homeland security and rescue forces, municipalities, industry and public utilities.

eVigilo's SMART (Scalable Messaging Application in Real-Time) is a modularized multi-channel alert and notification platform for alerting the population and closed groups across fix & mobile networks, TV, radio, sirens and Internet. Given its modularized architecture, SMART can be tailored according to the requirements of the specific customer. Customers can select different setups and functionalities subject to communication channel availability and sizing. SMART is available on various levels such as SMART for Governments, SMART for Municipalities and SMART for Enterprises.

www.evigilo.net

GMafcon

The V-ALERT Perimeter Intrusion Detection System is a unique and versatile ELECTRONIC SENSOR based alarm detection system providing integrated OUTDOOR and INDOOR security solutions.
Using the V-Alert technology as the core detection system, GM Afcon provides a total security solution for Perimeter Projects.
The V-Alert Sensor is an ELECTRONIC SENSOR with no moving parts, has ADJUSTABLE SENSITIVITY of individual sensors and provides INDEPENDENT and PINPOINT alarm indications from each sensor.
The technology provides proven integrated security solutions for a wide range of applications that includes Perimeter Border Fences, Port and Airports, Solar Farms and Solar Panels, Cellular and communication base stations, Water, Gas & Electricity Utilities, Power plants and Industrial and Military Sites.
 www.gmsecurity.com

Geospotx

The visual mapping concept was exposed to the general public in recent years with the launce of Google Street View and Microsoft Street side services that allows having virtual tours in major cities' streets from the point of view of pedestrian. However not every country allows Google's car to photograph it streets.
The Israeli start-up company Geospotx Ltd. provides a solution for this need. The company has developed the Street 360 system that allows the user to photograph an area and to create a visual map in which at any point of the map he can press a button and see the street from the point of view of a person standing in the street

www.geospotx.com

Hatehof

Founded in 1947, Hatehof is among Israel's leading Manufacturers of high quality, field proven:
• Armored Personal Carrier vehicles
• Aircraft Refuelers
• Firefighting vehicles
• Decontamination containers
• Riot Control vehicles
• Special purpose trailers for military And other security force deployment.
Backed by a global reputation built on 60 years of excellence. Hatehof's interdisciplinary team of highly experienced engineers and state of the art certified ISO 9001 facilities enable the company to handle multiple large-scale, complex projects simultaneously. Offering a complete range of in-house services concept, design, manufacture, assembly, inspection, professional literature, and cataloging, Hatehof is a major supplier to both the IDF and other armed forces.
www.hatehof.co.il

Hydro Noa
HYDRO NOA specializes in developing, design and manufacturing of high standard rescue equipment. Constantly investing in R&D introducing advanced and innovative rescue tools
All products are ergonomically designed, lightweight, quiet, easily operated, powerful, Most of the tools are designed to operate by a single person (right /left handed).
Independent ,needs no outer power source Used for:
*Breaching & Extrication * Breakthrough Rescue * Cutting & spreading
Our exclusive product line is adequate as standard equipment at:
Special anti-terror units ,Fire brigades, Air and marine ports, Municipality authorities, electric power stations, Federal, civil rescue authorities and much more.
www.hydronoa.com

INEX/ZAMIR
INEX/ZAMIR is a world leader in advanced vehicle identification, offering a suite of solutions that identify the vehicle's license plate, color, and model. INEX/ZAMIR's combined hardware/software solutions create real time actionable intelligence for SafeCity/HLS initiatives, traffic enforcement, and Intelligent Traffic Systems (ITS). Edge systems transmit vehicle events and alerts directly to customer command-and-control systems or interfaced to leading international security solution providers such as NICE, Verint, Elbit, ONSSI, Milestone, and others.
www.inexzamir.com

Intelicomm

Intelicomm Intelligent communications,
Experience with direct/critical communications support and consultation, knowledge in development, design and manufacture of instant Mobile Wireless Network solutions and products for mission critical applications. A leading company in the field of instant mobile communications, specializing in voice communications, video, and data devices with/without any infrastructure and with wireless mesh networking products designed for extreme environments.
Intelicomm offers a "Continuous Communications System"
www.intelicomm.com

Ispra Ltd.

Founded in 1969, ISPRA is a global leader in developing, manufacturing and marketing of non lethal devices for riot control, crowd management, anti terror equipment and police gear .
ISPRA Less Lethal Innovative product line has kept us in the forefront of non lethal ammunition throughout the years. We are developing today innovative products and solutions for the problems of tomorrow .
Sentinel Tactical Gear provides top-quality equipment for law enforcement, military and homeland security agencies, providing them with the tools to complete their missions safely and effectively. Sentinel Tactical Gear product line includes a full range of police duty gear, protective gear and tactical equipment.
www.ispraltd.com

Fire and Rescue Authority

The Chief goal of the Fire and Rescue Authority is to save lives as quickly as possible and reduce the damage inflicted by fire on the environment and property
www.102.gov.il

Israel Police

Policing and law enforcement in Israel are the sole responsibility of the Israel Police.
As a national force, the Israel Police is responsible for all aspects of policing, including crime prevention and law enforcement.
The work of the Israel Police takes on a whole new dimension when operating in such a sensitive area as Israel.
The main areas on which the Israel Police focuses are:
Public Security, Maintaining Law and Order Fighting Crime,
www.police.gov.il

Israel Prison Service
The Israel Prison Service is part of the national law enforcement system. As such it holds both security and social missions.
The organizations goals are to keep all prisoners under safe yet appropriate custody while providing them with basic needs and offering corrective programs for prisoners who qualify. Therefore, the Israel Prison Service makes its' best efforts to improve the working conditions of the staff, utilize sophisticated technologies to the fullest, develop proper incarceration establishments and design appropriate treatments for every individual.
The IPS always looks forward and seeks for ways optimize its' work, using all the available measures in the fields of security, correction, education, treatment and technology.

Ispra
Founded in 1969, ISPRA is a global leader in developing, manufacturing and marketing of non lethal devices for riot control, crowd management, anti terror equipment and police gear.
ISPRA Less Lethal Innovative product line has kept us in the forefront of non lethal ammunition throughout the years. We are developing today innovative products and solutions for the problems of tomorrow.
Sentinel Tactical Gear provides top-quality equipment for law enforcement, military and homeland security agencies, providing them with the tools to complete their missions safely and effectively. Sentinel Tactical Gear product line includes a full range of police duty gear, protective gear and tactical equipment
www.ispraltd.com

Live U
TV-quality live video from the field using multiple existing networks such as cellular, SATCOM, or WiFi. Situational awareness, live visual intelligence gathering, mobile surveillance, riots and crowd control, border protection, disaster and emergency management, covert operations and more. NLOS TV-quality transmission based on multiple cellular networks available from anywhere, including vehicles, helicopters, indoors, rural areas, border areas, metro, etc.
A compact man-carried or vehicle mounted device has a video encoder and several cellular modems integrated inside it, as well as connections to SATCOM. The device uses all available modems/networks simultaneously by splitting the video and/or data between all of them. Patented technology.
www.liveu.tv

Magna
A 3D intrusion detection system Magna developed a unique system based on 3D cameras and sophisticated algorithms providing over 99% detection rate and a minimum false alarm rate (Magna's patent save).
Magna uses the same principle as the human vision system - two eyes and a brain.

With stereoscopy technology, all the target parameters are immediately and automatically calculated. Among Magna's system abilities are: distance to target, dimensional size, velocity and movement directions, nuisances targets filtration etc.
The technology is patented saved and popular in sensitive sites as nuclear plants, airports, borders etc., around the world.

Mifram
Mifram Ltd. is one of Israel's leading multidisciplinary firms which successfully combines industrial and civil engineering projects erection.
The company was established in 1962, and was involved in the design, manufacture and erection of a wide range of industrial plants, as well as expansion of existing production lines.
Mifram's involvement in the country industrialization and development also touches several security and military projects.
Mifram Ltd is a privately owned company that employs 200 employees, located in the northern part of Israel with overall turnout of 20 M US$.
www.miframsecurity.com

Ministry of Public Security

The Ministry of Public Security was founded in 1948 as the Ministry of Police. Its Minister has three areas of responsibility – public security, law enforcement, and corrections – as well as a number of operational bodies: The Israel Police, Israel Prison Service, Israel Fire and Rescue Authority, Israel Anti-Drug and Alcohol Authority and the Witness Protection Authority.
http://mops.gov.il/english/Pages/HomePage.aspx

Mprest

mPrest systems' vision was to build a generic Command and Control infrastructure and literally reinvent the way large system integration projects are developed and implemented.

Thanks to this game changing technology approach, mPrest has managed to reach a unique position in the market, which provides a key competitive advantage to the system integrators which have made of mPrest their Command & Control infrastructure of choice for their projects globally.

The most important of these partnerships was signed with RAFAEL, which has recognized these unique capabilities and has made of mPrest its Command & Control system house, owning 50% of the company shares since 2010, and bringing some of the company's largest successes, including the prestigious Iron Dome project.

Based on its infrastructure, mPrest developed sophisticated vertical solutions for the Defense market first, and then for Homeland Security (HLS), critical assets management, monitoring and other civilian applications.

Nirtal training & supply of combat equipment ltd.

Combat Training, Security Consultation & Analysis, Equipment Acquisition & Provision for Military, Law Enforcement & Private Sector

Training such as:army special opps. & commando Units, Counter Terror, VIP protection, Anti-Crime, Intelligence & Surveillance, Border Patrol & Immigration, maritime security , Naval & Underwater Combat, Airport Security & Air Marshals, Prisons, Crisis Management, Detectives and Investigators, Public Transportation Security, Infrastructure Facilities (Petroleum, Gas and Electricity) and lots more.
 www.nirtal.com

Ortech Defense Systems Ltd.
Provides advanced protection solutions to Missiles, Scuds, Katiushas, Mortar shells, Blasts and Ballistics for existing structures and sites in Israel and abroad.
The Ortech protection specialists will customize the best protection solutions to counter the threats you are exposed to.
It is important for us to provide protection solutions, in which you will feel protected and safe to carry on with your daily routine without disturbance.
Ortech supplies all kinds of stripes/bands : tying, fascinating, dragging, lifting, as well as sunshades, and manufacture to the exact needs of the client.
Ortech is an approved Ministry of Defense supplier, the products have the Ministry of Defense's and the Home Front Command's certifications as well as an ISO certification.

Picsix
PICSIX Ltd. is an innovative vendor of interception and counter interception products. Our products cover a wide array of applications such as: Passive and active interception products, Counter Interception detectors, etc.
www.pic-six.com

Plasan Security Solutions
Plasan Security Solutions is a global leader in the field of customised integrated vehicle-borne solutions for the homeland security and defence markets.
Plasan designs and manufactures a variety of armoured tactical manned vehicles, featuring exceptional 4x4 maneuverability and high survivability. The vehicles are equipped with fully integrated intelligence, surveillance, reconnaissance, command and communication technologies and IED, HAZMAT, CBR & fire protection systems. The technologies can also be integrated into the customer's existing vehicles.
Plasan's advanced solutions are the product of its numerous years of expertise and field-proven experience in R&D, design and prototyping, engineering, systems integration and advanced manufacturing capabilities. The company's success is based on its innovation, comprehensive range of in-house capabilities and high level of commitment to its customers.
The superior level of performance of Plasan's mission-oriented vehicles allows optimally meeting diverse homeland security and defence needs.
www.plasansec.com

RBtec

RBtec Ltd. was established in 1986 by security experts using extensive knowledge and many years of field experience in large integrated electronic security projects for medium to high-risk installations.
Today, RBtec is a leading technology company specializing in the design, development and manufacturing of quality outdoor perimeter detection technologies.
We provide reliable, effective and affordable solutions suitable for any site where outdoor perimeter detection is required.
RBtec's products are manufactured under stringent quality control practices and meet or exceed international civil and military standards including: ISO9002:2013 and various applicable US MIL-STDs.
www.rbtec.com

Reshet Graf Ltd.
Manufacturer of passive IFF solutions for NVG, thermal imaging devices and surveillance cameras.
Custom Infrared ID patches, Thermal ID patches and rescue panels, for positive identification of personal and vehicles.
Passive thermal targets for training and calibration.
www.reshet-graf.co.il

RT
RT LTA Systems LTD is a world – class – designer, developer and manufacturer of the Skystar Aerostat family proven for use in intelligence, surveillance, reconnaissance and communications applications.
Users active in prevent-prepare-respond-recover settings requiring continuous and compact aerial support are a natural fit for Skystar products.
RT LTA Systems LTD delivers self-contained, versatile, easily transportable, cost effective tactical system comprised of a mobile control station, ground system module, tether, lighter-than-air platform, stabilized payload platform and sophisticated sensor suite.
The Skystar systems have more than 500,000 proven operation hours in battle zones all around the world.
Skystar systems are easy to operate, rapidly deployed and customized for a range of operating conditions

worldwide in various military and civilian missions.
Currently systems are deployed in countries such as Israel (IDF, Police), Afghanistan, Canada, Mexico, Russia and African's countries.

Safer Place

Safer Place is leading the next generation Automatic Video Based traffic and parking enforcement technologies. Safer Place provides a single platform and infrastructure for multiple applications for life risking moving traffic and parking violations. Our solution enables to automatically detect, report and archive a wide variety of traffic violations providing undisputable legal evidence, and which significantly impact driving behavior and public safety.
The High Risks Traffic Violations include: speed, average speed, crossing the median, not yielding the right of way to pedestrian and to a car, not following traffic sign (stop sign, U-turns and more), illegal turns, public transportation lanes, double parking, parking on a crosswalk and many more. The solutions are installed either as a mobile system in a car or a fixed system on light posts with low environmental impact.
Safer Place's end-to-end solution approach and platform capabilities enhance traffic enforcement at the lowest cost per violation caught creating an extremely efficient process. The solutions are installed either as a mobile system in a car or a fixed system on light posts with low environmental impact.
www.saferplace.com

SensoGuard

SensoGuard is an Israeli company that develops innovative seismic sensor-based protection systems.
The company's products provide comprehensive protection solutions for a variety of sites such as:
Power plants, communication sites, agricultural areas, detention facilities, strategic and high security zones, private properties, banks and so on.
SensoGuard's security systems recognize threats whenever fluctuations are sensed in their vicinity and send an early warning before the intrusion actually occurs.
These threats may include footsteps, moving vehicles, digging, use of physical force, drilling, cutting

actions and explosions.
SensoGuard's security systems are tailor-made solutions built according to each client's specific requirements, thus providing the perfect protection.
www.sensoguard.com

Septier Communications Ltd
Septier Communication Limited, founded in 2000, is a fast growing, highly profitable private company that serves customers worldwide. Septier provides innovative, reliable and cost-effective telecom and packet based solutions and products for the security (law enforcement and intelligence agencies) and telecommunications (telecom companies and service providers) market. These solutions include communications interception and analysis systems, cellular location tracking infrastructure, anti-fraud applications and network surveillance products.
www.septier.com

Seraphim Optronics
Seraphim Optronics Ltd. Is a well-established company for over 18 years, which specializes in electro-optical systems for covert surveillance in defines, military, paramilitary and civilians markets. Seraphim develops, produces, sells and supports its products worldwide. As a system house, Seraphim can tailor the solution to the customer's requirements.
www.seraphim.co.il

Servision
Servison develops and manufactures fully-integrated video monitoring systems for mobile and fixed security applications. The company's advanced video technology solutions enable users to secure fleets of

vehicles and a wide range of remotely located sites. Our flagship product is a mobile DVR that is optimized for streaming live video from any kind of vehicle/moving platform.
www.servision.net

Shafir Production Systems
Specializes in developing and producing advanced technology computerized systems for the civilian, medical and the renewable energy industries in Israel and around the world.
Shafir is the largest and leading Israeli company in its field, with over 30 years of experience developing complex systems tailored to the customer's requirements.
www.shafir.co.il

S.T.I
S.T.I. ltd (Security Technology Integration) was established to provide a wide range of security solutions for the Para-military and policing forces.
STI operates in the development and marketing of solutions & systems for the Homeland security &

Homeland Defense Global Market. The company's team members are highly trained field experts with proven experience in identifying operational security flaws, diagnosing security needs and providing a technological solution to meet security needs. All our systems are manufactured from high quality and durable materials ensuring long and reliable functioning in a wide range of operational environments. STI emphasizes on short time to market development cycle, cost effective products keeping in mind the ergonomic design and a friendly user interface fitted to meet the operator and end users unique needs. STI's systems comply to ISO 9001:2008 requirements and are registered as patents in the U.S and around the world.

Terrogence
Since 2004, Terrogence has been a pioneering leader in the field of Open Source & Deep Web Intelligence. Terrogence intelligence services are unique in their methodology, breadth of coverage and depth of analysis, dedicated to exposing terrorist and insurgent threats and capabilities as they come to light, both on the open and deep web. Web intelligence professionals at Terrogence run Virtual HUMINT™ operations in multiple languages across numerous deep web social media sources, to provide visibility into adversary intent and capabilities. Our products, services and solutions are designed for government agencies and private corporations worldwide. Some of the Terrogence long-term tailored reports are listed below :
Möbius™ - deep analysis and reliable assessment of the current operational IED capabilities of terrorists and insurgents worldwide through the monitoring of open and deep web sources where terrorists and insurgents organize tactics and plan attacks .
Al-Khemia™ - in-depth forensic analysis via a laboratory re-synthesis of homemade explosives (HME) recipes extracted by Terrogence from online terrorist forums, knowledge bases and social networks .
Terrogence Alert Service™ - reports on threats or terror capability developments of imminent interest as encountered by Terrogence intelligence professionals during the course of strategic web-intelligence operations .
Hydra™ - The nature, scope and dynamics of extremists' use of the Internet, and salient strategic information about developments in the hard-core jihadi Web.

Wave Guard

Solutions for Governments

A set of solutions for continuous monitoring and management of cellular antennas, Guardian Government enables national regulators to obtain the relevant on-line information related to mobile antennas in order to ensure public safety, quality of service, compliance with licenses and national standards.

Solution for Operators

Continuous monitoring, management and control system for self regulation related to radiation, spectrum and QoS. Guardian Operator enables the operator to ensure compliance with licenses and regulations during the RF planning stage and during the operational stage. Moreover, this automated solution enables time efficient management of installation and transmission permit requests.

Checkmarx
Checkmarx provides the best way for organizations to introduce security into their Software Development Lifecycle (SDLC). The product enables developers and auditors to easily scan un-compiled code in all major coding languages and identify its security vulnerabilities. With Checkmarx's CxSuite, auditors and developers have immediate access to the code analysis results and remediation advice. We provide user friendly, high productivity, flexible and accurate risk intelligence platform that ensures your application remains hacker-proof .
Checkmarx has been named a "Challenger" in Gartner's 2014 AST Magic Quadrant and announced "Best Product in Application Security 2014" by Cyber Defense Magazine.

Hybrid Security

Hybrid Security's innovative approach provides web hacking and fraud detection. Detection is performed in real-time, and across all platforms, without impacting user experience. By understanding normal user behavior patterns, Hybrid Telepath locates anomalies in web user sessions. Resulting in detection of a very wide range of cyber-attacks, bots and fraudulent activities in web applications.

Hybrid security employs 3 layers of web security:

* Predictive Analytics - Monitors all web traffic to preform statistical analysis and detect Non-human traffic.
* Open-Source Intelligence - Automatically updating a knowledge-base of known online threats.
* Behavior Rules - The solution implements customizable rules intended to detect known malicious behavior patterns.

After easy and quick installation, Telepath automatically constructs and updates profiles of each and all web application user behavior, inside and outside of the organization. It maps out the application's typical business processes, and accurately identifies various fraud scenarios without disrupting regular business flow and client web sessions. In the event fraud the solution produces alerts and forensic reports, in real-time, for immediate mitigation and forensic investigation.

www.hybridsec.com

Nation E

Founded in 2010 as an energy Information and Communication Technology (ICT) company, Nation-E focusses on energy cyber-security, demand/response and energy risk management solutions. Today, Nation-E is a global company with its HQ in Israel and subsidiaries in the US (Fort Lauderdale, Florida), the EU (Warsaw, Poland) and local representations in Switzerland and Germany.

Originally developing unique cutting edge stationary and mobile fast charging solutions, Nation-E has positioned itself as an energy storage solutions pioneer. During our operations, Nation-E discovered that despite the vast efforts and resources invested in data security, similar efforts are not being conveyed to the fields of energy security and energy risk management. These two challenges have since become Nation-E's focus - the development of microgrid islanding topologies and methodologies optimizing energy production and consumption in an organization. Nation-E's years of hardware and software R&D investment have resulted in the submission of 25 worldwide protected patents to date, in various stages of approval.

Netline

Netline Vehicle mounted IED/ Bomb jammers – designed to protect military/ senior VIP convoys from remote activation of improvised explosive devices (IEDs).
Dismounted/ portable jammers with different power levels and size, hand or back carried, protecting military ground troops, bomb squads, counter-terror units/ SWAT teams and more.
Jammers for fixed installations – designed to block sensitive areas where using wireless communication (cellular phones, wireless LAN, etc) is forbidden – prisons, government facilities, military headquarters, etc.
Wireless and cellular communication detectors – connected to a main control unit, providing real time alerts whenever an attempt to make/ receive wireless communication signal is detected.

PineApp™

Pine App Is a prominent security and cyber solution provider offering a comprehensive range of Email security and Web filtering systems to the world market.
From homeland sensor security to carrier grade, high-performance Anti-Botnet systems for ISP's and Telco's - OSG, to scalable applications for all size companies and Cloud-Managed services, PineApp has the solution.
Available as appliances or software, including virtual platforms, PineApp security solutions are renowned for performance, reliability, ease of implementation and cost effectiveness
www.pineapp.com

Radiflow

RADiFlow provides secure communication solutions for critical infrastructure utilities with distributed deployments.

Typical applications are the Electricity Smart-Grid, the modern Smart- City/Safe-City, Oil & Gas and Intelligent Transportation.

RADiFlow provides a security IPS (Intrusion Prevention System) solution optimized for large-scale distributed automation applications.

This solution is based on a service-aware security engine integrated into ruggedized access switches/gateways performing role-based validation of every SCADA session in the network.

Our integrated architecture enables an efficient deployment of the SCADA security in each access point of the network.

www.radiflow.com

RDeye

RDeYe specializes in designing and implementing integrated intelligence, security, and cyber protection campaigns that improve the ability of states, security organizations, and private companies to counter varied security challenges in the areas of intelligence, Homeland Security (HLS), terror, serious crime, crisis management, corruption, and other national security issues.

Our management team and our group of experts bring many years of experience in security and intelligence agencies, facing various security challenges and managing large-scale security projects, and in customizing special security concepts and technologies to meet the security needs and threats that our customers face.

In our solutions we represent and integrate some of the best of bread Israeli technological companies.

Safe T

Safe-T is a provider of secure data exchange solutions for a wide range of industries including financial, healthcare and manufacturing organizations. Safe-T Box, enables organizations to share data securely between people, applications and businesses and is designed for fast and easy deployment and wide user acceptance. Safe-T's RSAccess secure front-end solution, eliminates the need to store sensitive data in the DMZ, thereby reducing exposure to data breaches.

Focused on providing security solutions for the enterprise market, Safe-T enables organizations to benefit from enhanced productivity, efficiency, heightened security, and improved regulatory compliance.

Safe-T's clients include enterprises in the financial, insurance, education, manufacturing, and high-tech sectors where thousands of business users safely share millions of files and emails each day.

Safe-T Security Solutions

Safe-T's solutions are focused in two areas:

1.   Securing data exchange in and out of the enterprise using Safe-T Box securedata exchange platform
2.   Protecting data and applications in the DMZ with RSAccess secure front-end.

www.safe-t.com

Sasa Software

Sasa Software specializes in IT security. Our leading product is the Gate Scanner which secures incoming data in a very innovative and sophisticated way.

The Gate Scanner has been launched and implemented for the past three years, and is a fully tested mature product.

The Gate Scanner solutions are cleaning and removing any up to date malicious malwares from any external storage devices (USB's, CD's, Portable Hard Disks ect) and/or 3rd party applications including E-mails and Web.

The Gate Scanner solution has a unique "offline" approach by encountering threats before it has entered into the LAN, in which all data and files are being transferred through "online". The Gate Scanner is an important additional supplement to the security layer.

The Gate Scanner will provide the right protection at the highest level, which will allow organizations to maintain its daily operations and keep receiving incoming data.

Our Gate Scanner product has received official certification from the IT divisions of the Israeli Security Agency and the Ministry of Defense Security Authority.

SenseCy

SenseCy enables business enterprises and public organizations to identify and monitor cyber threats, mitigate risks to critical assets, ensure ongoing operation and minimize legal liabilities.

SenseCy helps customers to keep pace with rapid technology developments and increasing exposure to potential cyber threats. Our technology enables you to discover, track and prioritize cyber threats to your corporate assets and business operations.

SenseCy specializes in the collection, production and analysis of any type of open-source information including: Deep-Web sites, Darknet, social networks, forums and discussion groups, research institutes as well as news and media websites, and utilizes a unique approach to malware identification and analysis prior to widespread distribution and availability.

The SenseCy intelligence suite includes threat alerts, cyber feeds, leak detection and intelligence reports. SenseCy customers include global leaders in a wide range of industries such as finance and banking, telecommunication, defense and aerospace, public transportation, critical infrastructure, and healthcare services.

Theta Ray

ThetaRay is a leading provider of unknown threat detection solutions to critical infrastructure, financial institutions, and organizations using Industrial Internet. The company's core technology is based on state of the art machine learning algorithms which power its proprietary Hyper-Dimensional Big Data Analytics™. Nowadays, highly customized, sophisticated cyber-attacks easily circumvent traditional security, with adversaries being able to breach, lurk, and operate surreptitiously inside compromised networks for months and years before they are exposed, always due to impact. ThetaRay's patented, award-winning platform automatically uncovers unknown cyber and operational threats within minutes, allowing customers to take action and avert disaster before any damage can occur. Organizations tasked with securing highly heterogeneous environments that include ICS/SCADA devices, IoT and multiple other data sources, leverage ThetaRay's unmatched detection and low false positive rates as a see-all power that enables them to unify detection and defeat the unknown
www.thetaray.com

Trapx security

TrapX is a leading provider of cloud-based and on-premises cyber-security solutions.   Some of the world's leading Global 2000 enterprises serving the financial services, national critical infrastructure, retail, healthcare, pharmaceutical, and other industries rely on TrapX to strengthen their IT ecosystems and reduce the risk of costly and disruptive compromises, data breaches, and compliance violations.
With the TrapX 360 platform, Global 2000 enterprises are able to detect and analyze Zero-Day and undetected malware used by the world's most destructive Advanced Persistent Threat (APT) organizations, build threat profiles, block attacks, and automatically remediate damage inflicted on IT ecosystems. The TrapX 360 platform captures Zero-Day malware in its virtualized sensor network of honeypots and next-generation malware traps before the malware can inflict significant damage to customers' data centers or cloud deployments.
The TrapX 360 Platform provides real-time, adaptive threat protection by leveraging our patented HoneyGridTM malware trap and DPI technology.
www.trapx.com

Trustware101

Trustware's BufferZone is a patented containment solution that defends endpoints against advanced malware and zero-day attacks while maximizing user productivity with unrestricted access to information. By isolating potentially malicious content from web browsers, email and removable storage, BufferZone complements existing endpoint security platforms to defend the organization from advanced threats that evade detection. BufferZone includes a configurable bridge for transferring content and data safely between the container and secure network zones, and provides critical intelligence for enterprise-wide security analytics. Easy to deploy and configure, BufferZone is a lightweight solution that works seamlessly with leading management platforms to provide cost-effective containment for up to thousands of endpoints.
 www.trustware.com

Waterfall

Waterfall is the leading provider of strong network security products which protect the safety and the reliability of control system networks.

Waterfall Security Solutions' mission is to eliminate the use of firewalls in critical infrastructure control systems. The company develops products which provide stronger-than-firewall protections for industrial control networks. Waterfall's products are deployed in utilities and critical national infrastructures throughout North America, Europe, Asia and the Middle-East.

Waterfall's innovative products dramatically reduce the cost and complexity of compliance with NERC-CIP, NRC, NIST, CFATS and other regulations, and include support for leading industrial applications, including the OSIsoft PI™ Historian, the GE Proficy™ iHistorian, Siemens SIMATIC™/Spectrum™ solutions and GE OSM™ remote monitoring platforms, as well as OPC, Modbus, DNP3, ICCP and other industrial protocols. Frost & Sullivan describe Waterfall's solutions as ensuring "optimum security for networks across user verticals" and awarded Waterfall the 2012 Network Security Award for Industrial Control Systems Entrepreneurial Company of the Year and the 2013 North America Award for Customer Value Enhancement.

www.waterfall-security.com.
